

Tecop TEC12.2

The **Tecop TEC12.2** is a versatile and compact drilling rig designed for geotechnical investigations and sampling. Its compact construction allows for easy transportation and manoeuvrability, making it ideal for accessing confined or difficult-to-reach sites.

The TEC12.2 is well-suited for standard penetration tests (SPTs), dynamic sampling, and rotary drilling operation; capable of coring down to depths **below 15m**.

Compatible with both water and air flush systems, can be configured for use with down-the-hole (DTH) hammers, open-holing and various drag bits.

Dimensions

| | |
|--------------------------|---------|
| Width | 760 mm |
| Width (with cage) | 1044 mm |
| Height (max. in transit) | 1710 mm |
| Height (max. rotary) | 4041 mm |
| Height (max. dynamic) | 3275 mm |
| Length | 3213 mm |
| Weight | 1450 kg |
| Drop weight | 63.5 kg |
